

Joint Venture Scaffolding Ltd. invest in the new MAN TGE with MAN Financial Services.

Joint Venture Scaffolding Ltd are Scotland's leading independent provider of combined safety netting, roof edge protection and scaffolding services.

As a multi-disciplined company, and part of a larger ZL Group of Companies, they offer a complete range of solutions to all sizes of industrial and commercial companies encompassing main contractors, local councils, roofing contractors, private landlords, general builders and much more.

Constantly looking for ways to innovate and grow, they are currently seeking to expand their current service offering to customers whilst continuing to be at the forefront of working at height safety.

Following their recent investment in four new MAN TGE vans, we asked David Irvine, (Group Director) why Joint Venture Scaffolding decided on the TGE:

Why did you choose MAN?

When ZL Group recently acquired Joint Venture Scaffolding Ltd, we identified that the commercial vehicles were a key area to be invested in. We were looking for a reliable and economical vehicle that would also provide our employees with comfort and safety. The load capacity and warranty on offer with the MAN vehicles were better than many competitors, those were also significant factors.

What was the benefit in using MAN Financial Services?

The whole process was easy and straightforward, with the rates being very competitive.

The other benefit was the time saving, as they took ownership of the whole process and only required information once. This resulted in a quick turnaround in getting the deal completed.

How did you find the customer service from MAN Financial Services?

The whole experience, from dealing with the salesman on site all the way through to the MAN Financial Services representative, was fantastic and professional. Nothing was too much trouble and when they promised something, this was delivered on time. I would not hesitate in recommending.

What is next for Joint Venture Scaffolding Ltd?

Joint Venture Scaffolding Ltd will continue to invest in innovative products and systems to allow us to exceed our customers' expectations and continue to grow.

We will continue to work hard to ensure we remain agile to react to the changing needs of the marketplace and focus on industry accreditations to enforce the fact that we are the premier independent provider of combined safety netting, roof edge protections and scaffolding services in Scotland.
